

ABOS Breastfeeding Candidate Form Part I Certification Examination

The American Board of Orthopaedic Surgery (ABOS) provides an option for breastfeeding mothers to have additional break time and access to a nursing mother space during the ABOS Part I Certification Examination.

To accommodate additional break time, the examination seat time will extend to two days - 5 hours 30 minutes for day 1 and 5 hours and 40 minutes for day 2. All accommodation requests must be submitted before examination scheduling in April. Any request submitted after the deadline will be considered but a convenient Pearson VUE Testing Center location or the same location for both days cannot be guaranteed. The ABOS timing information chart and deadline date is available at www.abos.org.

Please complete the form and send to accommodations@abos.org. Once the accommodation form is received, the ABOS Associate Executive Director will review the request within 10 business days. An email decision will be sent to the individual with instructions on how to schedule for the examination.
