

ABOS Breastfeeding Candidate Form Part II Board Certification Examination

The American Board of Orthopaedic Surgery (ABOS) provides an option for breastfeeding mothers to have access to a nursing mother space before or after the ABOS Part II Board Certification Examination. The private space will include access to power, a refrigerator, and a secure place to store equipment during an examination.

The ABOS Part II Examination is conducted over 3 hours and 15 minutes, including the Candidate Briefing. The date and time of individual examinations are posted approximately six weeks before the examinations. All accommodation requests must be submitted three weeks before the examination. Any request submitted after the deadline will be considered but space cannot be guaranteed.

Please complete the form and send to accommodations@abos.org. Once the accommodation form is received, the ABOS Executive Director will review the request within 10 business days. An email decision will be sent to the individual with instructions.

Please indicate the time window when the space would be needed:

Time:

Will you need to access the space after your examination to gather breast milk and equipment?

☐ Yes

☐ No
