ABOS Orthopaedic Sports Medicine Practice-Profiled Recertification Examination Blueprint

Table of Contents

General Principles	7%
Biostatistics/epidemiology	1.5%
Legal/ethical	2%
Basic Science Principles	3.5%
Spine	3%
Cervical	2%
Thoracic/ Lumbar	1%
Upper Extremities	32%
Clavicle	3%
Scapula	1%
Glenohumeral joint: Dislocations/instability/labral injuries	7%
Glenohumeral joint: Rotator cuff	6%
Glenohumeral joint: Nerve injury, proximal humerus fracture, proximal biceps tendinitis/tear	5%
Elbow joint: Dislocations/instability	2%
Elbow joint: Cartilage, arthritis, nerve injury, fracture	1%
Elbow joint: Tendon/muscle tears	2%
Wrist joint	2%
Hand	3%
Lower Extremities	41%
Pelvis	1%
Hip joint: Dislocation/instability	3%
Hip joint: Femoral acetabular impingement	3%
Tibiofemoral joint: Dislocation/instability/ligament	11%
Tibiofemoral joint: Fracture	6%
Tibiofemoral joint: Cartilage/meniscus	5%
Patellofemoral joint: Dislocation/instability	3%
Patellofemoral joint: Fracture	2%
Leg	1%
Ankle joint: Dislocation/instability	1%
Ankle joint: Fracture	2%
Ankle joint: Tendon/muscle	1%
Foot: Dislocation/instability	1%
Foot: Fracture	1%

ABOS Orthopaedic Sports Medicine Practice-Profiled Recertification Examination Blueprint

Table of Contents (continued)

Multiple Sites/Systemic/Other	17%
Multiple trauma, nonorthopaedic	1%
Complications following surgical procedures: Deep venous thrombosis/pulmonary embolism	1%
Complications following surgical procedures: Infection, mechanical failure, anesthetic complications, other	3%
Medical aspects of sports medicine: Cardiology	1%
Medical aspects of sports medicine: Concussion	2%
Medical aspects of sports medicine: Head and face, pulmonary, gastrointestinal, genitourinary, skin, Marfan syndrome	2%
Medical aspects of sports medicine: Endocrine	1%
Medical aspects of sports medicine: Environmental exposure	1%
Medical aspects of sports medicine: Infectious disease	1%
Medical aspects of sports medicine: Pain management	2%
Physeal injury and growth arrest	1%
Neoplasms	1%

ABOS Orthopaedic Sports Medicine Practice-Profiled Recertification Examination Blueprint

<i>General Principles</i>	<i>7%</i>
Biostatistics/epidemiology	1.5%
Legal/ethical (including team physician issues)	2%
Basic Science Principles (including biologic therapy)	3.5%

<i>Spine</i>	<i>3%</i>
Cervical	2%
Thoracic/Lumbar	1%

Upper Extremities	32%
Clavicle/Acromioclavicular joint/Sternoclavicular joint	3%
Scapula (fracture, neuropathy, os acromiale, scapular dyskinesia)	1%
Glenohumeral joint: Dislocations/instability/labral injuries	7%
Glenohumeral joint: Rotator cuff	6%
Glenohumeral joint: Nerve injury, proximal humerus fracture, proximal biceps tendinitis/tear	5%
Elbow joint: Dislocations/instability	2%
Elbow joint: Cartilage, arthritis, nerve injury, fracture	1%
Elbow joint: Tendon/muscle tears	2%
Wrist joint (dislocation/instability, nerve injury, fracture [eg, distal radius, carpus])	2%
Hand (dislocation/instability, tendon/muscle, fracture)	3%

Lower Extremities	41%
Pelvis	1%
Hip joint: Dislocation/instability, fracture, tendon/tear, cartilage	3%
Hip joint: Femoral acetabular impingement	3%
Tibiofemoral joint: Dislocation/instability/ligament	11%
Tibiofemoral joint: Fracture (including distal femur, proximal tibia), arthritis, osteonecrosis, nerve injury, infection, heterotopic ossification, synovitis, Osgood-Schlatter disease, Baker cyst	6%
Tibiofemoral joint: Cartilage/meniscus	5%
Patellofemoral joint: Dislocation/instability	3%
Patellofemoral joint: Fracture, arthritis, tendon/muscle, cartilage, nerve injury, infection, heterotopic ossification	2%
Leg (compartment syndrome, stress fracture, shin splints)	1%
Ankle joint: Dislocation/instability	1%
Ankle joint: Fracture (including pilon fracture), cartilage, osteonecrosis, nerve injury, infection	2%
Ankle joint: Tendon/muscle (including Achilles and peroneal tendons)	1%
Foot: Dislocation/instability, tendon/muscle, arthritis, cartilage, osteonecrosis, nerve injury, infection, tarsal coalition, flatfoot, sesamoid	1%
Foot: Fracture	1%

Multiple Sites	17%
Multiple trauma, nonorthopaedic (eg., chest/abdominal blunt trauma)	1%
Complications following surgical procedures: Deep venous thrombosis/pulmonary embolism	1%
Complications following surgical procedures: Infection, mechanical failure, anesthetic complications, other (eg, nerve injury)	3%
Medical aspects of sports medicine: Cardiology	1%
Medical aspects of sports medicine: Concussion	2%
Medical aspects of sports medicine: Head and face, pulmonary, gastrointestinal, genitourinary, skin, Marfan syndrome	2%
Medical aspects of sports medicine: Endocrine (including relative energy deficiency in sports and diabetes)	1%
Medical aspects of sports medicine: Environmental exposure	1%
Medical aspects of sports medicine: Infectious disease	1%
Medical aspects of sports medicine: Pain management (including complex regional pain syndrome and opioid sparing/multimodal pain management)	2%
Physcal injury and growth arrest	1%
Neoplasms (benign or malignant)	1%
